SUMMARY

Entrepreneur and junior full-stack web developer with 1 year experience in web development, MERN-stack. Proven ability to develop and maintain web applications, databases, and user interfaces. Skilled in the use of HTML5, CSS3, JavaScript, JQuery, and GraphQL. Seasoned at building partnerships, fostering collaborative relationships, and acting as translator between business users and internal teams. Experienced in product ownership. Seeking a position as a junior programmer, customer support specialist, or product manager.

EXPERIENCE

Owner – Certified Personal Trainer
Willpower Fitness, LLC   **April 2021 – Present, Franklin, TN**
· Launched a results-driven personal training business, reaching max capacity clients within six months.
· Prioritized clients' needs, incorporating individualized programming while implementing quantitative tools to assess progress.

Manager
Pure Sweat + Float Studio   **August 2021 – February 2022, Nashville, TN**
· Navigated client-facing relationships, collaborative relationships, and internal-facing problem solving and leadership.
· Efficient time-manager, prioritizing tasks and delivering a first-class experience, training and developing six team members at two studio locations.

Lead Strength and Conditioning Coach/Group Instructor
Iron Tribe Fitness   **January 2019 – April 2021, Nashville, TN**
· Implemented product vision and strategy, leading 175+ athletes, relationship building, sales, client engagement and retention.
· Grew from client to coach/staff within the first year of membership, resulting in high-impact levels with both clients and internal team members.

PROJECTS

athletetracker
Vanderbilt University Full Stack Web Developer Program · January 2023 – January 2023
· MERN-stack single-page application built for personal trainers' to have access to client information, digital waiver, and payment options-- all at their fingertips. Having the ability to use while with their clients, trainers' save time, alleviate the need for paper waivers, and eliminate redundant recording of information.
· Scalable MongoDB back end, a GraphQL API, Express.js and Node.js server with a React front end, and user authentication with JWT to build a user-focused platform.

Goal-E
Vanderbilt University Full Stack Web Developer Program · November 2022 – November 2022
· A full-stack application built with mobile-first in mind to help users write and keep track of short-term and long-term goals more efficiently.
· This application uses Node.js and Express.js to create a RESTful API, Handlebars.js as the templating engine, MySQL and the Sequelize ORM for the database, includes authentication (express-session and cookies), and protects API keys and sensitive information with environment variables.
